

# SILS HOME WORKING POLICY

## Scope and Definitions

This policy applies to all staff who work from home and/or use or access School systems or information from home or while working remotely. This includes individuals who are given access to the School networks and School data (including governors, students, visitors, volunteers, contractors and third parties). It applies to information in all formats, including paper records and electronic data.

Remote working means working off the School site. This includes working while connected to the School's networks.

A mobile device is defined as a portable device which can be used to store or process information. Examples include but are not limited to laptops, tablets, USB sticks, removable disc drives and smartphones.

## Awareness of Risk

Working from home presents both significant risks and benefits.

Staff may have remote access to information held on secure School servers, but without the physical protections available in School. Without the network protections provided by firewalls and access controls, there are much greater risks of unauthorised access to data as well as a risk of loss or destruction of data. There are also greater risks posed by information "in transit" (i.e. moving data between office and home).

The risks posed by working from home can be summarised under three headings:

- **Reputational:** the loss of trust or damage to the School's relationship with its community;
- **Personal:** unauthorised loss of, or access to data could expose staff or students to identity theft, fraud or significant distress; and
- **Monetary:** regulators such as the ICO can impose financial penalties and those damaged as a consequence of a data breach may seek redress through the courts.

## Roles and Responsibilities

The decision as to whether to allow partial or full-time homeworking in relation to any given role rests with management.

Any member of staff working from home is responsible for ensuring that they work securely and protect both information and School-owned equipment from loss, damage or unauthorised access.

Managers are responsible for supporting their staff's adherence with this policy. Additional measures may be put in place by management to ensure the rules contained within this policy are adhered to (for example, monitoring or supervision).

Failure to comply with this policy may result in disciplinary action.

## **Key Principles of Homeworking**

Staff working from home must ensure that they work in a secure and authorised manner. This can be done by complying with the principles below: -

- i. To adhere to the principles of the Data Protection Act 2018 and the School's Data Protection Policy in the same way as they would if they were working in School.
- ii. Access to personal data must be controlled. This can be done through physical controls, such as locking the home office for physical data, and locking the computer by using strong passwords (a mixture of letters, numbers and special characters).
- iii. No other members of the household should know or be able to guess your password(s). If passwords are written down (which should be a last case scenario) they must be stored securely (e.g. in a locked drawer or in a secure password protected database). Passwords should never be left on display for others to see.
- iv. Automatic locks should be installed on IT equipment used to process School information that will activate after a period of inactivity (i.e. computers should automatically lock requiring you to sign back in after this period of time).
- v. IT equipment used to process and store School information in the home must be kept in a secure place where it cannot be easily accessed or stolen.
- vi. Portable mobile devices used to process and store School information should be encrypted where possible (or at least password/pin code protected) and should never be left unattended in a public place.
- vii. IT equipment in the home used to process School information should not be used where it can be overseen by unauthorised persons.
- viii. It is the responsibility of each member of staff to ensure that they are working in a safe environment at home. No health and safety risks must be taken when using this equipment.
- ix. Access to certain systems and services by those working from home or remotely may be deliberately restricted or may require additional authentication methods (such as two factor authentication which requires an additional device to verify individuals). Any attempt to bypass these restrictions may lead to disciplinary action.

- x. All personal information and in particular sensitive personal information should be encrypted/password protected before being sent by email where possible. Extra care must be taken when sending emails where auto-complete features are enabled (as this can lead to sending emails to similar/incorrect email addresses). The rules relating the sending of emails are outlined in the School's Acceptable Use Agreement.
- xi. Staff should always use school email addresses when contacting colleagues or students. If telephoning a child or parent at their home, staff should ensure that their caller ID is blocked.
- xii. Any technical problems (including, but not limited to, hardware failures and software errors) which may occur on the systems must be reported to your Line Manager immediately.
- xiii. To adhere to the School's Data Retention Policy and, ensure that information held remotely is managed according to the data retention schedule and securely deleted and destroyed once it is no longer needed.
- xiv. If communicating remotely via video conferencing and social media, staff must adhere to using only those platforms which have been approved by the School and follow the School's guidance on the safe use of video conferencing.
- xv. To be vigilant to phishing emails and not clicking on unsafe links. If clicked these links could lead to malware infection, loss of data or identity theft.
- xvi. Staff should not access inappropriate websites on School devices or whilst accessing School networks.
- xvii. Staff who have been provided with School-owned IT equipment to work from home must:
  - a. only use the equipment for legitimate work purposes;
  - b. only install software on that equipment if authorised by the School's IT support. Please note that this includes screen savers, photos, video clips, games, music files and opening any documents or communications from unknown origins.
  - c. ensure that the equipment is well cared for and secure;
  - d. not allow non-staff members (including family, flatmates and friends) to use the equipment or to share log in passwords or access credentials with them;
  - e. not attempt to plug in memory sticks into the equipment unless encrypted and supplied by the School);
  - f. not collect or distribute illegal material via the internet;
  - g. ensure anti-virus software is regularly updated; and
  - h. to return the equipment securely at the end of the remote working arrangement.

- xviii. Staff who process School data on their own equipment are responsible for the security of the data and the devices generally [and must follow the School's Bring Your Own Device Policy and Acceptable Use Policy](#). In particular:
- a. Devices must be encrypted where possible;
  - b. An appropriate passcode/password must be set for all accounts which give access to the device. Passwords must be complex (a mix of letters, numbers and special characters) and must not be shared with others;
  - c. The device must be configured to automatically lock after a period of inactivity (no more than 15 minutes);
  - d. Devices must remain up to date with security software (such as anti-virus software);
  - e. The theft or loss of a device must be reported to IT services just in the same way as if a School-owned device were lost;
  - f. Any use of privately-owned devices by others (family or friends) must be controlled in such a way as to ensure that they do not have access to School information. This will include school emails, learning platforms and administrative systems such as SIMs;
  - g. Devices must not be left unattended where there is a significant risk to theft;
  - h. The amount of personal data stored on the device should be restricted and the storing of any sensitive data avoided;
  - i. Using open (unsecured) wireless networks should be avoided. Consider configuring your device not to connect automatically to unknown networks;
  - j. If the device needs to be repaired, ensure that the company used is subject to a contractual agreement which guarantees the secure handling of any data stored on the device;
  - k. Appropriate security must be obtained for all School information stored on the device (including back up arrangements) and there must be secure storage for any confidential information;
  - l. Care must be taken with file storage. Any school related work should be stored on the School network area. No school data should be stored on a home computer or on an un-encrypted storage device (such as USB stick);
  - m. The School may require access to a privately owned device when investigating policy breaches (for example, to investigate cyber bullying);
  - n. All data must be removed from privately-owned devices when it is no longer needed or at the request of the School; and

## Appendix A – Homeworking Guidance Handout for Staff

**STOP** working from home or remotely if you are handling high risk/sensitive data:

- on a device without adequate protection (antivirus, encryption)
- in a public space (café, train)
- on public/unsecured WiFi connection
- without School authorisation

### **BEWARE**

Of... **home printer-sharing, remote desktop file-sharing, remote USB connections**

Due to an **increased risk of hackers** – This is not just about using devices or systems that are less secure, but also the risk of employees being duped into changing passwords or to download software that contains malware. Always be careful which websites you visit and which email attachments you open.

**CAUTION** working from home or remotely:

- using personally owned devices (tablet, smartphone)
- using unknown WiFi connections

**OK** to work from home or remotely:

- whilst on School premises/servers
- using a School owned device
- using a School owned device which is directly connected to the School network
- using a device and/or data which is encrypted.

**Disclaimer:**

- Staff are expected to use School owned and privately owned devices in an ethical manner at all times and adhere to the School’s policy as outlined above.
- The School reserves the right to take appropriate disciplinary action up to and including summary dismissal for non-compliance with this policy.
- The School reserves the right to disconnect devices or disable services or access to services without notification.

I confirm that I have read, understood and will comply with the terms of this Home Working Policy.
